

Online Searchable Formulary

Save on prescription drugs

Have you ever been surprised at the pharmacy when you found out how much you had to pay out-of-pocket for a prescription? With the Online Searchable Formulary you can find out what your costs could be before you go to the pharmacy.

The formulary is a list of all prescription drugs, divided into tiers that correspond to your out-of-pocket costs. You can save by choosing drugs on a lower tier, such as generics or preferred brand-name drugs. Remember, all plans do not cover all drugs.

How to use it

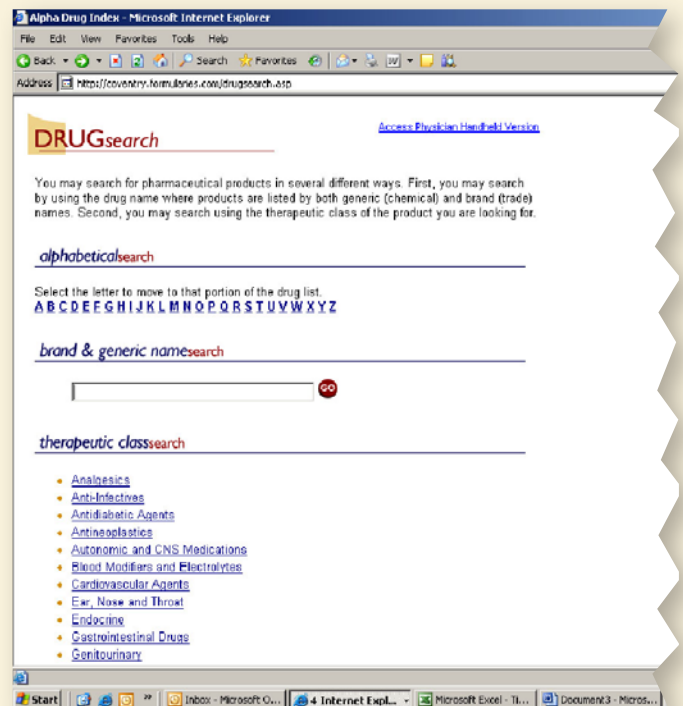

- Visit the web address on the back of your ID card and login to My Online ServicesSM.
- Select Pharmacy Benefits under Wellness Tools.
- Click on Coventry Drug Search

From this screen, you can search the drug list in the following ways:

- **By drug name**—just click the first letter of the drug name in the Alphabetical Search section.
- **For generic equivalents** using the Brand and Generic Name Search option. If a generic substitute exists, products are listed by both brand (trade) and generic (chemical) names.
 - Click in the entry box, type the first few letters (e.g., “Zoc”) or all of the drug name (e.g., “Zocor”), and click the Go button.
 - On the next screen, click on the name of the drug.
 - The next screen shows the generic equivalent (if available) in italics under the

brand name. It also shows whether the drug is covered by your plan under status, any plan restrictions and the drug assigned tier on the drug list.

- **By appropriate drug class** (e.g., “Gastrointestinal Drugs”) under the Therapeutic Class Search section.
 - Click on the class of drugs and then the sub-class.
 - A table shows all drugs in the sub-class with available generic equivalents in italics below the drug name, dosage/strength, whether the drug is covered by your plan, restrictions and drug tiers.

Use this information before you fill your prescription. If a doctor has prescribed a drug with higher out-of-pocket costs, you can call your doctor and ask if a more cost-effective drug might work for you. It's also a good idea to show the drug list to your physician at the time of your appointment.

Be a smart consumer and save. Use the Online Searchable Formulary before you fill your next prescription.
