

Randolph College Student Health Center
Health and Immunization Record Policy

All full-time students are required to complete a Medical Record consisting of the following components: demographics and medical history to be completed and signed by the student (pages one and two) – a parent or guardian signature is also required if the student is under the age of 18; physical exam and immunization form (pages three and four) to be completed by a physician/nurse practitioner/physician's assistant.

The medical records submitted by incoming students are reviewed for completeness, and students are notified of any significant deficiencies. Failure to resolve a deficiency in a timely manner results in a Registration hold.

Health Center services are provided at no additional cost to students, except for diagnostic lab tests. Students are not required to purchase student health insurance from the College or another provider in order to be seen at the Health Center.
